

## How to run the code –

STEP 1 — Extract the Project

STEP 2 — Open Project in VS Code

STEP 3 — Create Virtual Environment (VERY IMPORTANT)

Open VS Code terminal :

Run - `python -m venv venv`

Then run - `venv\Scripts\activate`

STEP 4 — Install Dependencies

Run - `pip install torch pandas scikit-learn tqdm`

STEP 5 — Place Your Dataset

Put your dataset inside project root:

`FILE_PATH = "data/sentiment.json"` in config.py

STEP 6 — Run Training Pipeline

Run - `python train.py`
